New

Electro-pneumatic Regulator Integrated Type 64-station Compatible Manifold

Plug-in Compact 5-Port Solenoid Valve

Solenoid valves and electro-pneumatic regulators can be connected to the same manifold.

Valve stations/Number of outputs: For 4 to 64 stations*1/128 points

*1 Stations are only available in multiples of 4.

Electro-pneumatic regulator stations: 1 to 4 stations
I/O unit stations: Max. 8 stations

Compatible protocol: PROFINET® EtherNet/IP® EtherCAT®

Reduced wiring | **Reduced number of SI units** | **Reduced wiring work** | **Compact**

Approx. 348 mm
(JSY3000-P: Manifold with 4 electro-pneumatic regulator stations and 4 solenoid valve stations)

134 mm shorter (28 % reduction)

Number of SI units	1 set
Power supply cable	1 cable
Communication cable	1 cable

Approx. 300 mm
(4-station electro-pneumatic regulator manifold)

Approx. 182 mm
(4-station solenoid valve manifold)

Number of SI units	2 sets
Power supply cable	2 cables
Communication cable	2 cables

JSY3000-P Series

Manifold Specifications

Wiring		Serial wiring EX600 for 64-station compatible manifold
Manifold type		Plug-in connector connecting base (64-station compatible manifold)
SUP/EXH port type		Common SUP/EXH (Common for the 3/5 port)
Valve stations		4 to 64 stations
Applicable connector		—
Internal wiring		Negative common
Port size	**1(P), 3/5(E) port**	Ø 10 One-touch fitting
	4(A), 2(B) port	Ø 4/Ø 6/Ø 8 One-touch fitting
Enclosure (Based on IEC 60529)		IP65

Formula for 64-station Compatible Manifold Weight*2

(Unit: g)

$$W = 47 \times n_1 + 852 + 138 \times n_2 + 535 \times n_3 + 676 \times n_4$$

n1: Number of valve stations*1
n2: Number of intermediate SUP/EXH blocks
n3: Number of electro-pneumatic regulators, ITV2340-□A
n4: Number of electro-pneumatic regulators, ITV2340-□(M, S)

*1 Stations are only available in multiples of 4, from 4 stations to 64 stations.

*2 Weight: "W" is the value for the internal pilot specification, the max. fitting size, and the manifold only. The valve weight is not included. To obtain the weight with valves mounted, add the valve weight given in the **catalogue on https://www.smc.eu** for the appropriate number of stations.

Manifold Flow Rate Characteristics

Model	Port size		Valve flow rate characteristics					
	1, 3/5 (P, E)	4, 2 (A, B)	1 → 4/2 (P → A/B)			4/2 → 3/5 (A/B → E)		
			C [dm³/(s·bar)]	b	Q [l/min(ANR)]*1	C [dm³/(s·bar)]	b	Q [l/min(ANR)]*1
JJ5SY3-P10 (Side ported)	C10	C8	2.23	0.30	567	2.77	0.27	691

* Calculation of effective area "S" and sonic conductance "C": S = 5.0 x C
* Values measured in accordance with ISO 6358:1989, JIS B 8390:2000
*1 These values have been calculated according to ISO 6358 and indicate the flow rate under standard conditions with an inlet pressure of 0.6 MPa (relative pressure) and a pressure drop of 0.1 MPa.

⚠Caution

Securing the DIN Rail Mounting Type Manifold

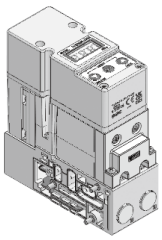

1. When mounting the manifold to a DIN rail using bolts, be sure that the bottom surface of the DIN rail is in contact with the manifold installation surface (in a horizontal state), then secure both ends of the DIN rail with the bolts. However, for other mounting methods or for side facing or upside down orientations, use the formula below to calculate the number of bolts to use at even intervals along the DIN rail.

   Formula: Number of bolts = DIN rail length/75 (Round up to the nearest whole number)
   Example) When the DIN rail length is 1123 mm, secure in 15 locations as a guide.

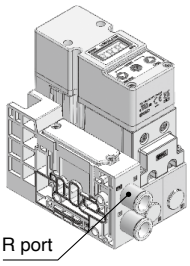

2. When using the manifold with a DIN rail in an environment where any vibration or impact is applied to it, the DIN rail itself may break. In particular, if the installation surface vibrates when mounting the manifold on the wall, or if a load is directly applied to the manifold, the DIN rail may break, causing the manifold to drop. When any vibration, impact, or load will be applied to the manifold, be sure to use a direct mounting manifold.

Ambient and fluid temperatures		0 to 50 °C (No condensation)		
Enclosure		IP65		
Weight		ITV2340-□□A: 535 g (Without tie-rod) ITV2340-□□ (M, S): 676 g (Without tie-rod)		

∗1 This specification table shows the characteristics at a power supply voltage of 24 VDC, ambient temperature of 25 ±3°C, and no load applied.
Only in static conditions, the pressure may fluctuate when air is consumed on the output side.

∗2 When the input signal is 0 %, there is residual pressure equal to or less than the minimum set pressure.
In cases where the pressure needs to be reduced completely to 0, install a 3-port valve, etc., on the output side to discharge the residual pressure.

∗3 Compliant with ISO 10094

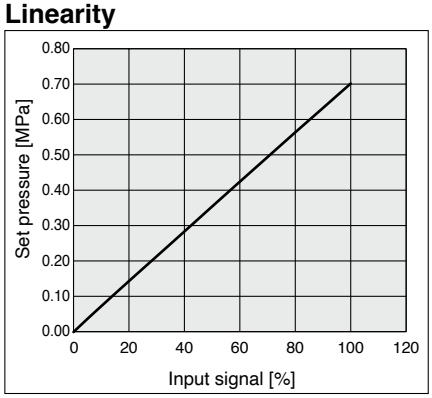

∗4 This is the characteristics to reach 90 % of the set pressure when the step amount are [0 →100 %], [25 →75 %], and [45 →55 %] under the max. supply pressure conditions.

∗5 The zero/span adjustment values are set by the minimum unit of the output pressure display. Note that the unit cannot be changed.

64-station Compatible Manifold
Plug-in Connector Connecting Base EX600
JSY3000-P Series

Internal Pilot

How to Order Manifolds

* Only the dedicated SI unit can be mounted on the 64-station compatible manifold.

JJ5SY3 − P 10S6 F ❶ ❷ ❸ − 24 B ❹ ❺ 1 ❻ − C8 ❼ ❽

Electro-pneumatic regulator integrated-type manifold identification symbol

❶ SI unit

0	Without SI unit
F	PROFINET
E	EtherNet/IP™
D	EtherCAT

* I/O unit cannot be mounted without SI unit.
* SI units, I/O units, and valve plates are shipped together with the product but do not come assembled.

❷ End plate (SI unit)

—	Without SI unit	
4	M12 power supply connector, B-coded (EX600-ED2)	
5	7/8 inch power supply connector (EX600-ED3)	
7	M12 power supply connector IN/OUT, A-coded	Pin arrangement 1 (EX600-ED4)
9		Pin arrangement 2 (EX600-ED5)

* When not selecting an SI unit, the symbol will be "—."

❸ I/O unit stations

—	None
1	1 station
⋮	⋮
8	8 stations

* When not selecting an SI unit, the symbol will be "—."
* SI unit is not included in I/O unit stations.
* When I/O unit is selected, it is shipped separately, and assembled by the customer. Refer to the attached operation manual for mounting.

❹ Valve stations

Symbol	Stations	Note
04	4 stations	Double wiring*1
08	8 stations	
⋮	⋮	
60	60 stations	
64	64 stations	

*1 Double wiring: 2-position single, 2-position double, 3-position, and 4-position valves can be used on all manifold stations.
The use of a single solenoid will result in an unused control signal.
This also includes the number of blanking plates.

* For stations, only multiples of 4, from 4 stations to 64 stations, can be selected.
The 4 boards inside the manifold are integrated.
* The ITV is not included in the number of valve stations. Max. 4 sets are supported.

❺ P, E port entry, SUP/EXH block assembly, Intermediate SUP/EXH block

P, E port entry	Internal pilot	Internal pilot, Built-in silencer	External pilot (Made to order)
U side (4 to 8 stations)	**U**	**C**	**G**
D side (4 to 8 stations)	**D**	**E**	**H**
Both sides (4 to 64 stations)	**B**	**F**	**J**

* Ensure a match with the common specification of the valve to be used.
* When not selecting an SI unit, the symbol will be "—."

❻ Number of intermediate SUP/EXH blocks, mounting position

Symbol	Qty.	Mounting position
0	0	—
1	1	Specify the mounting position on the manifold specification sheet.
⋮	⋮	
6	6	

* A block can be installed for every 4 valve stations, but as a guideline, it is recommended that one be installed for every 8 to 12 stations.

❼ Port size

Symbol	A, B port	P, E port
C4	Straight Ø 4	Straight Ø 10
C6	Straight Ø 6	
C8	Straight Ø 8	
CM*1	Straight port, mixed sizes	

*1 Indicate the sizes on the manifold specification sheet for "CM."

❽ Mounting and option

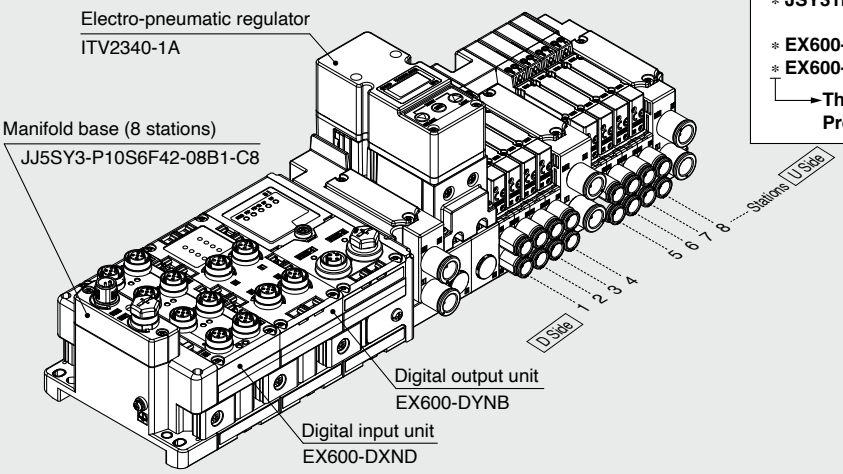

Symbol	Mounting
—	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)

* Option "D" with DIN rail mounting is not compatible with the product without an SI unit.
* Specify the DIN rail on the manifold specification sheet separately.

For details on the EX600 Integrated Type (For Output) Serial Transmission System, refer to the catalogue on https://www.smc.eu and the Operation Manual.
For the part numbers of the SI units to be mounted, refer to page 8. Please download the Operation Manual via the SMC website: https://www.smc.eu

How to Order Manifold Assembly

Example (JJ5SY3-P10S6F42-08B1-C8)

JJ5SY3-P10S6F42-08B1-C8
- ∗ **ITV2340-1A** ····· **1 set (Electro-pneumatic regulator, Valve supply type)**
- ∗ **JSY3200-5U** ····· **8 sets (2-position double part no.)**
- ∗ **JSY31M-40P-1A** ····· **1 set (SUP blocking disk, Mounted on the D side of the intermediate SUP/EXH block)**
- ∗ **EX600-DXND** ····· **1 set I/O unit part number (Station 1)**
- ∗ **EX600-DYNB** ····· **1 set I/O unit part number (Station 2)**

The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

· For the valve arrangement, the valve closest to the D side is considered the 1 st station. The electro-pneumatic regulator is not included in the number of stations.
∗ Stations are only available in multiples of 4.
· Specify the mounting locations and quantities of valves, electro-pneumatic regulators, and other options on the manifold specification sheet separately.

Internal Pilot

How to Order Valves (With mounting screw)

Refer to the JSY series catalogue on https://www.smc.eu for valve specifications.

JSY3000 Series

JSY 3 1 0 0 □ – 5 U □

❸ Pilot valve exhaust method

0	Pilot valve individual exhaust

❹ Rated voltage

Symbol	Coil specifications
—	Standard
T	With power saving circuit (Continuous duty type)

∗ Be careful of the energising time when the power-saving circuit is selected.

❺ Rated voltage

5	24 VDC

❷ Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed centre
4		Exhaust centre
5		Pressure centre
A	4-position dual 3-port	N.C./N.C.
B		N.O./N.O.
C		N.C./N.C.

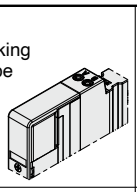

❻ Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
U	●	●	Non-polar
NZ			Polar Negative common

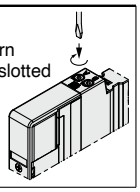

∗ Only "NZ" type is available with a power saving circuit.
∗ When the non-polar common specification type is selected, take measures to prevent surge voltage. For details, refer to the **catalogue on https://www.smc.eu**.

❼ Manual override

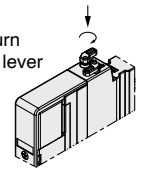

—: Non-locking push type

D: Push-turn locking slotted type

E: Push-turn locking lever type

∗ **When ordering a valve individually, the base gasket is not included.**
Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance.
Refer to the **catalogue on https://www.smc.eu** for base gasket and mounting screw part numbers.

⚠ Caution

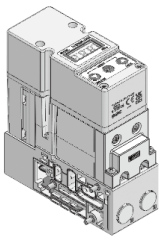

If the product is to be continuously energized, please be sure to select the power-saving circuit (continuous duty type) specification.

∗ Refer to the "With power-saving circuit" section in the "Specific Product Precautions" of the plug-in type JSY series **catalogue on https://www.smc.eu** for details.

⚠ Protective class class Ⅲ (Mark: ⧫)

JSY3000: JSY31V-23-2A (2 pcs.)

■SUP/EXH blocking disk

[SUP blocking disk]

Inserting an SUP blocking disk in the pressure supply passage of a manifold valve can allow for the use of 2 different pressures (high and low) in 1 manifold.

[EXH blocking disk]

Inserting an EXH blocking disk in the exhaust passage of a manifold valve can separate the exhaust from the valve so it does not affect the other valves. It can also be used in positive pressure and vacuum pressure mixed manifolds. (2 pieces are required to block both the EA and EB sides of the EXH.)

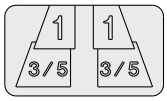

Series	SUP blocking disk	EXH blocking disk
JSY3000	JSY31M-40P-1A	JSY31M-40P-2A

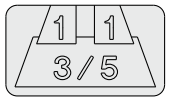

■Labels for blocking disks

These labels can be used to indicate and confirm where on the manifold the SUP/EXH blocking disk assemblies were inserted. (3 labels of each)

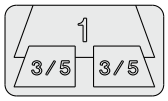

SUP/EXH blocking disk label

SUP blocking disk label

SUP blocking disk label

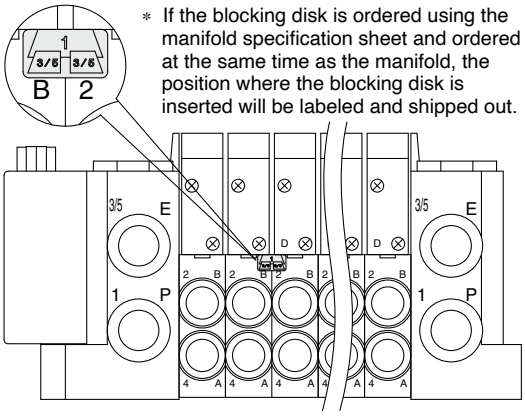

Series	Part no.
JSY3000	SJ3000-155-1A

⚠Caution

The manifold base cannot be disassembled by the customer. Specify the mounting location of the intermediate SUP/EXH block assembly on the manifold specification sheet.

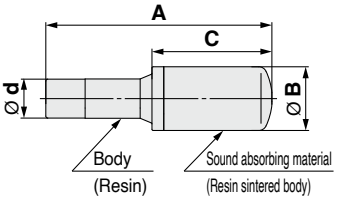

∗ If the blocking disk is ordered using the manifold specification sheet and ordered at the same time as the manifold, the position where the blocking disk is inserted will be labeled and shipped out.

■Silencer (One-touch fitting connection type)

This silencer can be mounted to the 3/5 (E: EXH) port of the manifold in one step.

∗ Shipped together with the product

Series (Ø **d**)	Model	Effective area	**A**	**B**	**C**
For JSY3000 (Ø 10)	**AN20-C10**	30 mm²	57.5	16.5	30.5

C10	Ø 10 One-touch fitting	●

Intermediate SUP/EXH block assembly accessories and the number of accessories

Accessories	Quantity
Tie-rod for additional stations	3 pcs.
A-❶ Manifold block gasket	1 pc.

∗ Gasket is mounted.

Clamp bracket

Series	Part no.
JSY3000	SY30M-15-1A

⚠Caution

The manifold base cannot be disassembled by the customer. Specify the mounting location of the intermediate SUP/EXH block assembly on the manifold specification sheet.

⚠ Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of **"Caution," "Warning"** or **"Danger."** They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC) [1], and other safety regulations.

⚠ **Danger:**	**Danger** indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.
⚠ **Warning:**	**Warning** indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.
⚠ **Caution:**	**Caution** indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.

1) ISO 4414: Pneumatic fluid power – General rules and safety requirements for systems and their components.
ISO 4413: Hydraulic fluid power – General rules and safety requirements for systems and their components.
IEC 60204-1: Safety of machinery – Electrical equipment of machines. (Part 1: General requirements)
ISO 10218-1: Robots and robotic devices - Safety requirements for industrial robots - Part 1: Robots.
etc.

⚠ Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.
Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalogue information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.
The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

3. Do not service or attempt to remove product and machinery/ equipment until safety is confirmed.
1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

4. Our products cannot be used beyond their specifications.
Our products are not developed, designed, and manufactured to be used under the following conditions or environments.
Use under such conditions or environments is not covered.
1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
2. Use for nuclear power, railways, aviation, space equipment, ships, vehicles, military application, equipment affecting human life, body, and property, fuel equipment, entertainment equipment, emergency shut-off circuits, press clutches, brake circuits, safety equipment, etc., and use for applications that do not conform to standard specifications such as catalogues and operation manuals.
3. Use for interlock circuits, except for use with double interlock such as installing a mechanical protection function in case of failure. Please periodically inspect the product to confirm that the product is operating properly.

⚠ Caution

We develop, design, and manufacture our products to be used for automatic control equipment, and provide them for peaceful use in manufacturing industries.
Use in non-manufacturing industries is not covered.
Products we manufacture and sell cannot be used for the purpose of transactions or certification specified in the Measurement Act.
The new Measurement Act prohibits use of any unit other than SI units in Japan.

Limited warranty and Disclaimer/Compliance Requirements

The product used is subject to the following "Limited warranty and Disclaimer" and "Compliance Requirements".Read and accept them before using the product.

Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first. [2] Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided. This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalogue for the particular products.

2) Vacuum pads are excluded from this 1 year warranty.
A vacuum pad is a consumable part, so it is warranted for a year after it is delivered. Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.
